

Oou „Mirce Acev“

By: Damjan Milenkovski

-
- "Mirce Acev" - primary school in Gjorce Petrov, Skopje. The first school building in Gjorce Petrov was built in the period from 1928 to 1930. Now it's gone, and many citizens remember that it was near the fire house. The name of the school at that time is not known, and immediately after the liberation it was named after the national hero Mirce Acev. Then, within the framework of the reconstruction and building of the state, the education of the young generations in Macedonian language begins. In the past 6.5 decades, a total of 6085 students completed primary education, and over 300 teachers were engaged in their education and upbringing.

Mirce acev

- A school that provides quality teaching tailored to the opportunities, needs and interests of students that nurtures personal responsibility, self-discipline, tolerance, mutual respect and motivation of all participants in school life.

- We encourage the development of our students' personality, their individuality, creativity, competitive and sports spirit, humanity, environmental awareness, critical thinking and building positive value systems in order to successfully cope in the environment. We train students to respect diversity and coexistence in a multicultural society. We follow the trends and the modernization of education through continuous professional development of the teaching staff.

Eco School

- Our school from the school year 2008/2009 became a member of the network of eco schools in the Republic. The program prepared by the Eco Board is implemented according to the plan.
- The project "Ride a bicycle" is being realized in our school, which is really of great importance. The aim of this project is to promote the bicycle as a means of recreation and transportation. The intentions of this project are to raise awareness among students and parents about using the bicycle instead of the car that pollutes the environment, improving muscles, burning calories among bicycle users.
