[FUNDAMENTAL - Students Presentations](#) από Αλεξάνδρα Καρακασίδου

Activity Description: As part of the eTwinning project “Fundamental,” students were asked to present themselves. Initially, they created their avatars using the Pixton tool. During this process, the important topic of publishing personal data and information was discussed. Then, in their English class, they wrote a short text about themselves. Finally, in the computer lab, they filled in the required information in a document that was shared with them for this purpose.
